1 Introduction

DR3-432 HART® intelligent pressure transmitter is an intelligent pressure measurement product with high accuracy, high stability, multi-parameter and four and a half digits LCD display. It conforms to HART® protocol. The users could manage, adjust or monitor the process variables by HART® communicator, and it could also be configurated by key-press at local working place.

The product uses the most advanced digital technique, temperature compensation, linearity correction and reliable ex-proof construction for production. The whole product has high accuracy, wider temperature compensation range and standard signal output to measure flow pressure precisely.

DR3-432 transmitter is 2-wire instead of 4~20mA analog output, can be communicated with Micro Sensor ROSEMOUNT 275 hand-communicator. Electromagnetic radiation conforms to IEC801 standard.

2 Features

- 4~20mA current output together with HART® (2-wire);
- digital compensation and linearity correction;
- -10°C ~80°C digital wider temperature compensation;
- Local and long-distance zero, range adjustment;
- Local key operation, easy configuration;
- Protection IP65.
